MahaPAR landing page: suggestions IDinsight · on the wireframe shared by the GAD UI team

2 · Two small typos
"conplete" → "complete" in this line, and "goverment" → "government" in the sign-in card.

1 · Could the stage that is live today be marked?
Something like "Self Appraisal · live now · closes 31 May · 14 days left". The other four rows could stay exactly as they are. Only one stage is live at any time, and that is the one piece of information most officials come for.

3 · Could this band carry the live deadline and the help centre contact?
The stage that is currently live with its closing date, and the help centre number and email for anyone who is stuck.

4 · Can we explore a short FAQ section here?
The top three only, as drop-downs, matching the three things an official most often needs to do. For example how to fill the self-appraisal, and how to create a Parichay SSO ID for those who do not have one. We can decide the three together. The fuller list can stay behind the FAQs tab above, but that tab is not easy to spot, so having the top three in the main view would help.

5 · Could the footer also carry related portals?
In addition to "Explore MahaPAR", a second set of links on its right for the related portals, Maha HRMS and the promotion portal.
