GOVERNMENT OF MAHARASHTRA · GENERAL ADMINISTRATION DEPARTMENT

Suggested refinements to the APAR dashboards developed by NIC

Nineteen observations from a walkthrough of the SPARROW APAR screens, each framed as a low-effort refinement that works within the existing design, and each referenced to the screen on which it was observed.

DRAFT FOR DISCUSSION

Prepared for
General Administration Department, and thereafter for NIC

Prepared by
IDinsight

Basis
19 screens recorded from the SPARROW APAR application, October 2026

Date
October 2026

What this note is, and what it is not

NIC has built a working APAR dashboard suite covering the officer's own window, service and instance level monitoring, departmental reports and workflow creation. The structure is sound and a good deal of the detail is well judged. This note does not propose a redesign. It records nineteen points noticed during a walkthrough of the screens, each of which can be addressed by changing what is written on the screen, the order in which elements appear, or what is shown when data is still awaited.

Within the present design

Every suggestion keeps NIC's existing layout, colour scheme and components. Nothing here calls for a new screen, a new report or a change to the underlying data model. Where a suggestion needs more than a change of wording or order, this is stated plainly on the page.

Referenced to the screen

Each page carries the screen on which the point was observed, so that NIC can locate it directly. The right-hand side shows the suggested form of the same element, drawn in NIC's own visual style.

Effort is our reading, not an estimate

The effort noted against each suggestion is IDinsight's assessment from the screens alone. NIC is best placed to confirm it, and we would welcome correction where our reading of the effort involved is mistaken.

How the suggestions are grouped

A · Clarity of information for decision-makers 5 points

Points where the figures on screen are sound but the labels, headings or notes accompanying them could be read differently from what is intended.

B · Navigation and ease of use 6 points

Points where information already held by the system takes more steps to reach than it might.

C · Clarity when data is awaited 4 points

Points where a screen shows a blank value or an empty table without indicating whether the position is pending, not applicable, or awaiting a selection by the user.

D and E · The officer's window, and workflow creation 4 points

Points specific to the window an officer sees for their own APAR, and to the screens on which the custodian creates the APAR workflow.

The nineteen suggestions at a glance

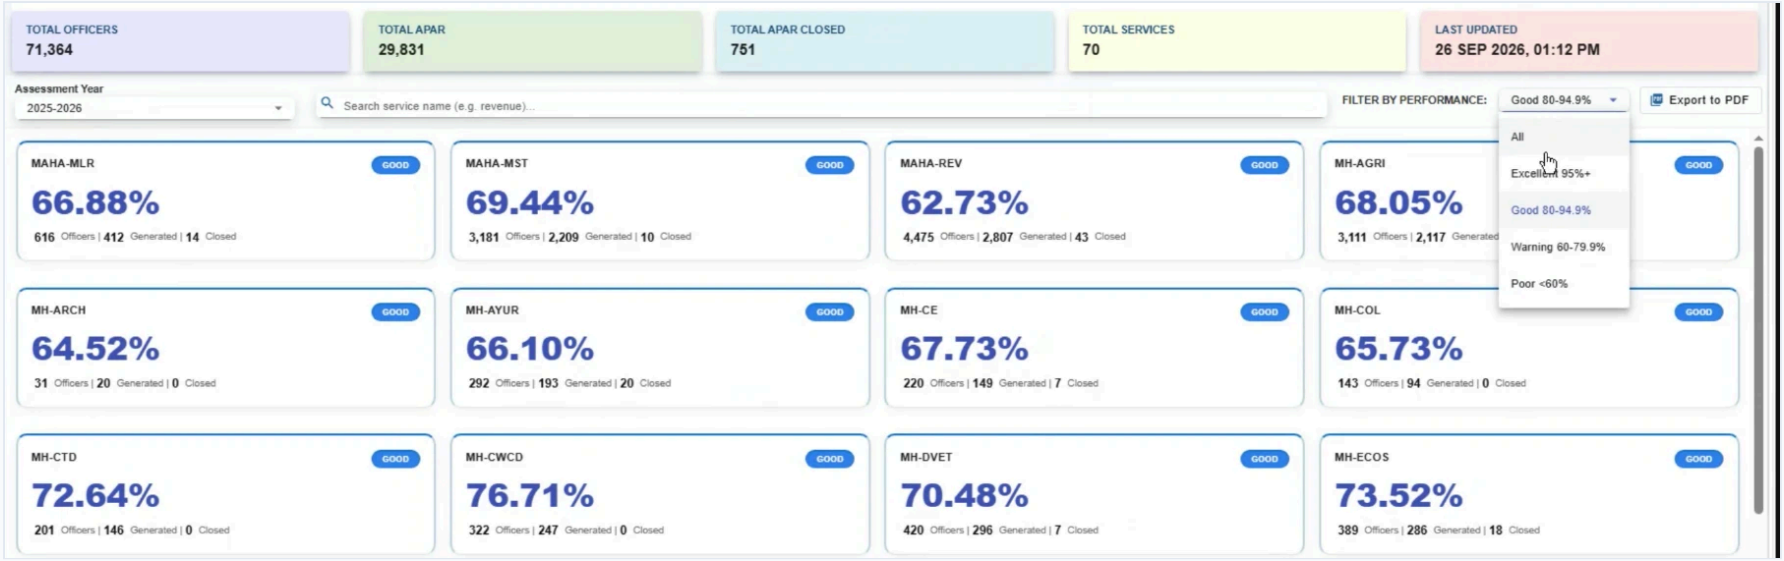

Ordered by group. The effort rating is IDinsight's reading of the screens and is offered for NIC to confirm or correct.

	GROUP	SUGGESTION	INDICATIVE EFFORT
1	A	Align the status label with the threshold scale already defined in the filter	Very low
2	A	Distinguish APAR completion from officer performance in the column headings	Very low
3	A	State the DPC eligibility threshold that the report actually applies	Very low
4	A	Bring the pendency columns to the front of the Service Dashboard	Low
5	A	Reconcile the two officer counts shown on the same screen	Low
6	B	Open the Service Dashboard on the Officer-wise view	Very low
7	B	Order the service cards by completion, lowest first	Very low
8	B	Give each pendency column a distinct heading	Very low
9	B	Allow the pending and pen-picture reports to run for all officers	Low
10	B	Use administrative wording in the status fields	Very low
11	B	Bring the Select Columns facility into view	Very low
12	C	Distinguish “no selection made” from “no records yet”	Low
13	C	Explain a blank grade rather than showing a dash	Low
14	C	Show how recent the figures are	Very low
15	C	Display implausible legacy values as “Not available”	Low
16	D	Make “My Pendency” answer what the officer must do	Low
17	D	Correct the spellings, and place IPR under its own menu	Very low
18	D	Show the roles the user presently holds	Very low
19	E	Avoid defaulting the same officer to both authorities, and stagger the two target dates	Low

A note on sequencing. Suggestions 17 and 2 — the spelling corrections and the wording of the performance labels — cost very little and are the points most readily noticed when the system is demonstrated. They may be worth taking up first. Suggestions 4, 9 and 16 would, in our assessment, make the greatest practical difference to the monitoring authorities, and would merit discussion with NIC on sequencing.

1 Align the status label with the threshold scale already defined in the filter

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The filter on the Instance Dashboard defines four bands: Excellent 95%+, Good 80–94.9%, Warning 60–79.9%, Poor below 60%. The service cards presently display the label **GOOD** at values between 60% and 77%, which fall in the Warning band by that same scale.

SUGGESTED REFINEMENT

Drive the label from the thresholds already written into the filter, so a service at 66.88% is shown as **Warning** and the card and the filter tell the same story. No new calculation is required; the bands exist.

Effort Very low — a single mapping between the existing bands and the label.

INDICATIVE FORM OF THE SUGGESTION

MAHA-MLR WARNING

66.88%

616 Officers | 412 Generated | 14 Closed

Warning band 60–79.9%

Why it helps. A senior officer scanning 70 cards reads the label before the number. Aligning the two means the dashboard can be relied upon at a glance, which is what it is for.

2 Distinguish APAR completion from officer performance in the column headings

AS PRESENTLY DISPLAYED IN SPARROW

S.NO.	ORGANIZATION NAME	OFFICERS POST...	APAR GENERATED	APAR CLOSED	APAR PARTIALL...	APAR COMPLET...	WORKFLOW CR...	WORKFLOW NO...	PAR PERCENTAGE	PERFORMANCE ...	PENDING CUST...	PENDING OFFIC...	PENDING REPO...	PENDIN
1	MH-LR-AMRAWATI REGION	77	99	2	0	0	0	23	70.13%	GOOD	0	9	19	34
2	MH-LR-AURANGABAD REGION	108	140	0	0	0	0	41	63.89%	GOOD	0	24	40	16
3	MH-LR-MUMBAI REGION	96	112	0	0	0	0	31	63.54%	GOOD	0	19	27	21
4	MH-LR-NAGPUR REGION	85	135	1	0	0	0	17	81.18%	EXCELLENT	0	13	14	68
5	MH-LR-NASHIK REGION	99	172	10	0	0	0	38	63.64%	GOOD	0	37	25	21
6	MH-LR-PUNE REGION	96	120	1	0	0	0	24	76.04%	GOOD	0	0	29	43
7	MH-LR-SETTLEMENT COMMISSIONER OFFICE	50	90	0	0	0	0	22	56.00%	WARNING	0	0	12	24
	Total	611	868	14	0	0	0	202			0	102	166	227

WHAT WE OBSERVED

The measure of how many APARs have been initiated is presently headed **PAR GENERATED PERFORMANCE**, and the accompanying column is headed **PERFORMANCE**. Both describe progress in filing, rather than the performance of the officers concerned.

SUGGESTED REFINEMENT

Rename the tile to **APARs initiated (%)** and the column to **Filing status**. The underlying figures stay exactly as they are.

Effort Very low — label text only.

INDICATIVE FORM OF THE SUGGESTION

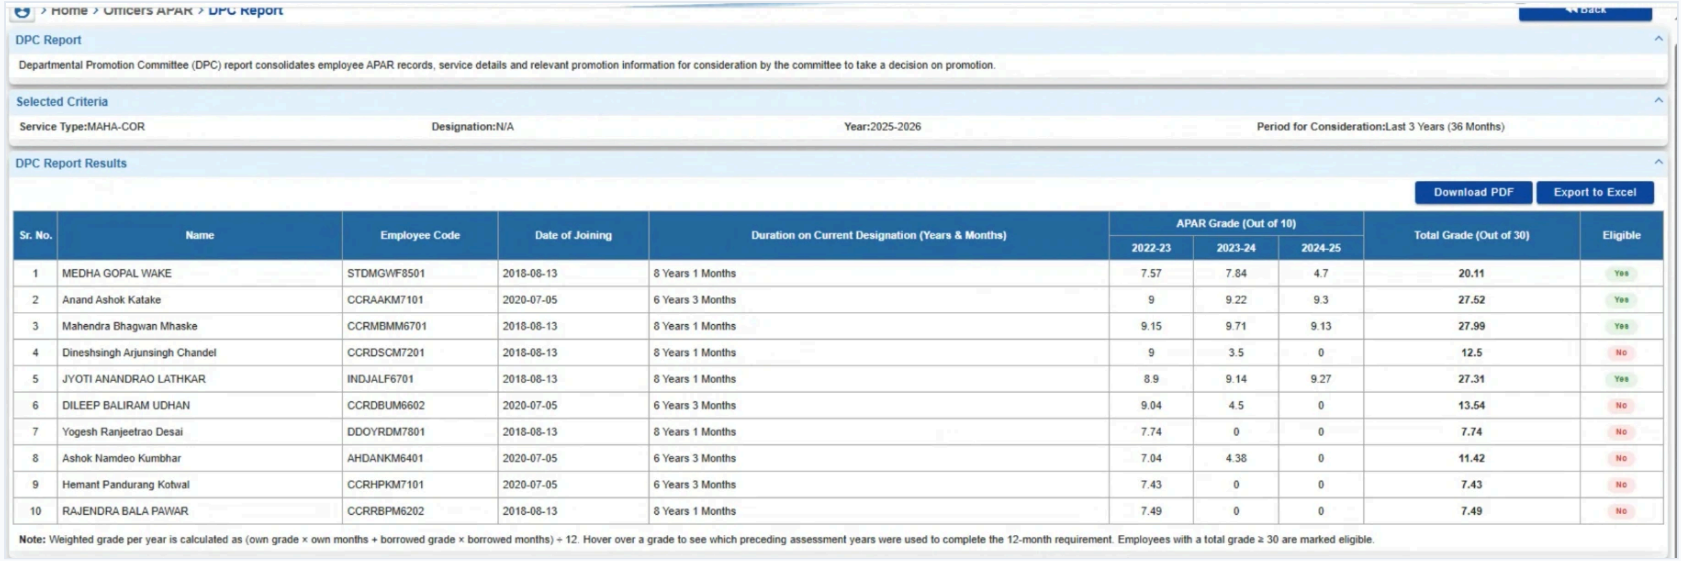

ORGANISATION	APARs INITIATED (%)	FILING STATUS
MH-LR-NAGPUR REGION	**81.18%**	ON TRACK
MH-LR-AURANGABAD REGION	**63.89%**	WARNING
MH-LR-SETTLEMENT COMM. OFFICE	**56.00%**	POOR

Same data, headings that say what is being counted.

Why it helps. It removes any possibility of a filing statistic being read as an assessment of a region's officers, and makes the dashboard's purpose self-evident to a first-time viewer.

3 State the DPC eligibility threshold that the report actually applies

AS PRESENTLY DISPLAYED IN SPARROW

Home › Officers APAR › DPC Report

Back

DPC Report

Departmental Promotion Committee (DPC) report consolidates employee APAR records, service details and relevant promotion information for consideration by the committee to take a decision on promotion.

Selected Criteria

Service Type:MAHA-COR | Designation:N/A | Year:2025-2026 | Period for Consideration:Last 3 Years (36 Months)

DPC Report Results

Download PDF | Export to Excel

Sr. No.	Name	Employee Code	Date of Joining	Duration on Current Designation (Years & Months)	APAR Grade (Out of 10)			Total Grade (Out of 30)	Eligible
					2022-23	2023-24	2024-25		
1	MEDHA GOPAL WAKE	STDMGWF8501	2018-08-13	8 Years 1 Months	7.57	7.84	4.7	20.11	Yes
2	Anand Ashok Katake	CCRAAKM7101	2020-07-05	6 Years 3 Months	9	9.22	9.3	27.52	Yes
3	Mahendra Bhagwan Mhaske	CCRMBMM6701	2018-08-13	8 Years 1 Months	9.15	9.71	9.13	27.99	Yes
4	Dineshsingh Arjunsingh Chandel	CCRDSCM7201	2018-08-13	8 Years 1 Months	9	3.5	0	12.5	No
5	JYOTI ANANDRAO LATHKAR	INDJALF6701	2018-08-13	8 Years 1 Months	8.9	9.14	9.27	27.31	Yes
6	DILEEP BALIRAM UDHAN	CCRDBUM6602	2020-07-05	6 Years 3 Months	9.04	4.5	0	13.54	No
7	Yogesh Ranjeetrao Desai	DDOYRDM7801	2018-08-13	8 Years 1 Months	7.74	0	0	7.74	No
8	Ashok Namdeo Kumbhar	AHDANKM6401	2020-07-05	6 Years 3 Months	7.04	4.38	0	11.42	No
9	Hemant Pandurang Kotwal	CCRHPKM7101	2020-07-05	6 Years 3 Months	7.43	0	0	7.43	No
10	RAJENDRA BALA PAWAR	CCRRBPM6202	2018-08-13	8 Years 1 Months	7.49	0	0	7.49	No

Note: Weighted grade per year is calculated as (own grade × own months + borrowed grade × borrowed months) ÷ 12. Hover over a grade to see which preceding assessment years were used to complete the 12-month requirement. Employees with a total grade ≥ 30 are marked eligible.

WHAT WE OBSERVED

The note below the DPC report reads *"Employees with a total grade ≥ 30 are marked eligible."* The Total Grade column is out of 30, and officers are being marked eligible at 27.52 and 27.31. The stated rule and the applied rule appear to differ.

SUGGESTED REFINEMENT

Restate the note to match the rule in use — for example **"Officers with a total grade of 27 or above across the three years are marked eligible."** If the intended rule is an average rather than a total, say so in the same line.

Effort Very low — one line of text, once the intended rule is confirmed with GAD.

INDICATIVE FORM OF THE SUGGESTION

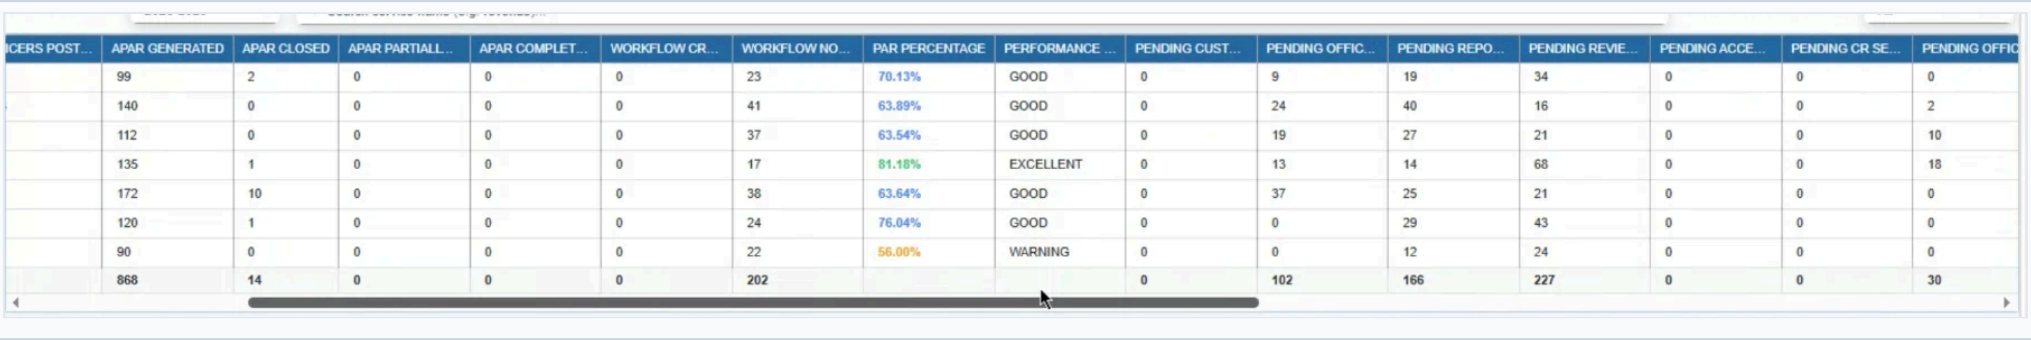

NAME	2022-23	2023-24	2024-25	TOTAL (30)	ELIGIBLE
Anand Ashok Katake	9.00	9.22	9.30	27.52	Yes

> **Note:** Officers with a total grade of 27 or above across the three assessment years are marked eligible. Hover over a grade to see which preceding years were used.

Why it helps. The DPC report supports promotion decisions and may be placed before a committee. A note that matches the computation protects the report from question at that stage.

4 Bring the pendency columns to the front of the Service Dashboard

AS PRESENTLY DISPLAYED IN SPARROW

ICERS POST...	APAR GENERATED	APAR CLOSED	APAR PARTIALL...	APAR COMPLET...	WORKFLOW CR...	WORKFLOW NO...	PAR PERCENTAGE	PERFORMANCE ...	PENDING CUST...	PENDING OFFIC...	PENDING REPO...	PENDING REVIE...	PENDING ACCE...	PENDING CR SE...	PENDING OFFIC
	99	2	0	0	0	23	70.13%	GOOD	0	9	19	34	0	0	0
	140	0	0	0	0	41	63.89%	GOOD	0	24	40	16	0	0	2
	112	0	0	0	0	37	63.54%	GOOD	0	19	27	21	0	0	10
	135	1	0	0	0	17	81.18%	EXCELLENT	0	13	14	68	0	0	18
	172	10	0	0	0	38	63.64%	GOOD	0	37	25	21	0	0	0
	120	1	0	0	0	24	76.04%	GOOD	0	0	29	43	0	0	0
	90	0	0	0	0	22	56.00%	WARNING	0	0	12	24	0	0	0
	868	14	0	0	0	202			0	102	166	227	0	0	30

WHAT WE OBSERVED

The Service Dashboard carries seven columns recording where an APAR is presently pending — with the custodian, the officer, the reporting authority, the reviewing authority, the accepting authority and the CR section. These sit to the right of the table and are reached only by horizontal scrolling, and several hold a value of zero for every row.

SUGGESTED REFINEMENT

Place the pendency columns immediately after the organisation name, move the APAR count columns to the right, and suppress any column holding zero for every row in the selected year. A **“Pending with”** group heading can span them.

Effort Low — column order and a rule to hide all-zero columns. No change to the query.

INDICATIVE FORM OF THE SUGGESTION

ORGANISATION	PENDING WITH			INITIATED	CLOSED
	Officer	Reporting	Reviewing		
MH-LR-AURANGABAD	24	40	16	140	0
MH-LR-NASHIK	37	25	21	172	10

Columns that were empty for every region are not shown for this year.

Why it helps. “With whom is the APAR presently lying” is the question the monitoring authorities ask most often. The data is already collected; this simply brings it into first view.

5 Reconcile the two officer counts shown on the same screen

AS PRESENTLY DISPLAYED IN SPARROW

TOTAL ORGANIZATIONS	TOTAL OFFICERS	PAR GENERATED	PAR NOT GENERATED	PAR GENERATED PERFORMANCE	LAST UPDATED
7	616	412	204	66.88%	26 SEP 2026, 05:08 PM

Assessment Year: 2025-2026 | Search service name (e.g. revenue)... | FILTER BY PERFORMANCE: All

S.NO.	ORGANIZATION NAME	TOTAL OFFICERS	OFFICERS PAR GENERATED	OFFICERS PAR NOT GENERATED	OFFICERS PARTIAL PAR GENERATED	OFFICERS PAR COMPLETED	PERFORMANCE %
1	MH-LR-AURANGABAD REGION	108	69	39	0	0	63.89%
2	MH-LR-MUMBAI REGION	96	61	35	0	0	63.54%
3	MH-LR-NASHIK REGION	99	63	36	0	0	63.64%
4	MH-LR-PUNE REGION	96	73	23	0	0	76.04%
5	MH-LR-SETTLEMENT COMMISSIONER OFFICE	50	28	22	0	0	56.00%
6	MH-LR-NAGPUR REGION	85	69	16	0	0	81.18%
7	MH-LR-AMRAWATI REGION	77	54	23	0	0	70.13%
	Total	611	417	194	0	0	

WHAT WE OBSERVED

The summary tile reports **616** total officers while the table total below reports **611**. Separately, APARs generated (868) exceeds officers posted (611), which is consistent with officers having more than one reporting period in the year, though this is not stated on screen.

SUGGESTED REFINEMENT

Reconcile the two counts, or add a single clarifying line beneath the table: **“An officer with more than one reporting period in the year has an APAR for each period, so APAR count may exceed officer count.”**

Effort Low — one explanatory line; reconciliation of the tile requires a check of the counting basis.

INDICATIVE FORM OF THE SUGGESTION

TOTAL OFFICERS

611

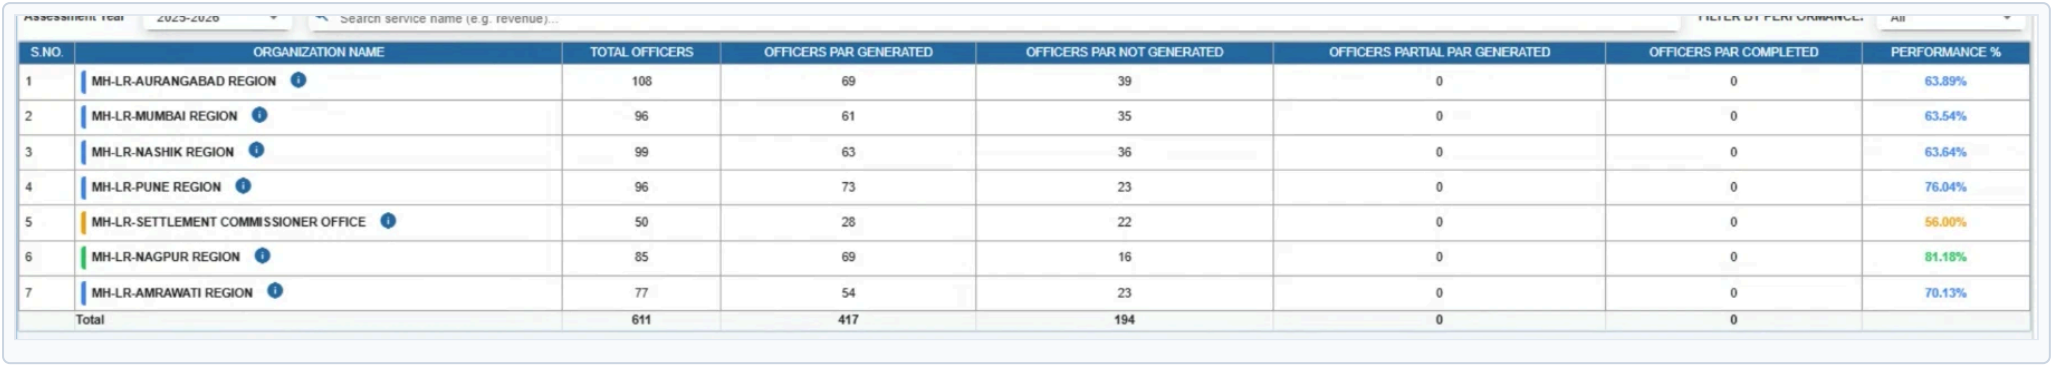

As per the regional table below

> An officer with more than one reporting period in the year has an APAR for each period. APAR count may therefore exceed officer count.

Why it helps. Monitoring authorities are likely to notice the difference and ask. One line settles it, and spares NIC and GAD a recurring query.

6 Open the Service Dashboard on the Officer-wise view

AS PRESENTLY DISPLAYED IN SPARROW

Assessment Year 2025-2026 | Search service name (e.g. revenue)... | Filter by Performance: All

S.NO.	ORGANIZATION NAME	TOTAL OFFICERS	OFFICERS PAR GENERATED	OFFICERS PAR NOT GENERATED	OFFICERS PARTIAL PAR GENERATED	OFFICERS PAR COMPLETED	PERFORMANCE %
1	MH-LR-AURANGABAD REGION	108	69	39	0	0	63.89%
2	MH-LR-MUMBAI REGION	96	61	35	0	0	63.54%
3	MH-LR-NASHIK REGION	99	63	36	0	0	63.64%
4	MH-LR-PUNE REGION	96	73	23	0	0	76.04%
5	MH-LR-SETTLEMENT COMMISSIONER OFFICE	50	28	22	0	0	56.00%
6	MH-LR-NAGPUR REGION	85	69	16	0	0	81.18%
7	MH-LR-AMRAWATI REGION	77	54	23	0	0	70.13%
	Total	611	417	194	0	0	

WHAT WE OBSERVED

The screen offers two views. **Officer-wise Statistics** presents seven columns, all fully visible. **PAR-wise Statistics** presents around fourteen, most abbreviated and requiring horizontal scrolling. The second appears to open first.

SUGGESTED REFINEMENT

Make Officer-wise the view that opens by default, with PAR-wise one click away for those who need the detail.

Effort Very low — default tab selection.

INDICATIVE FORM OF THE SUGGESTION

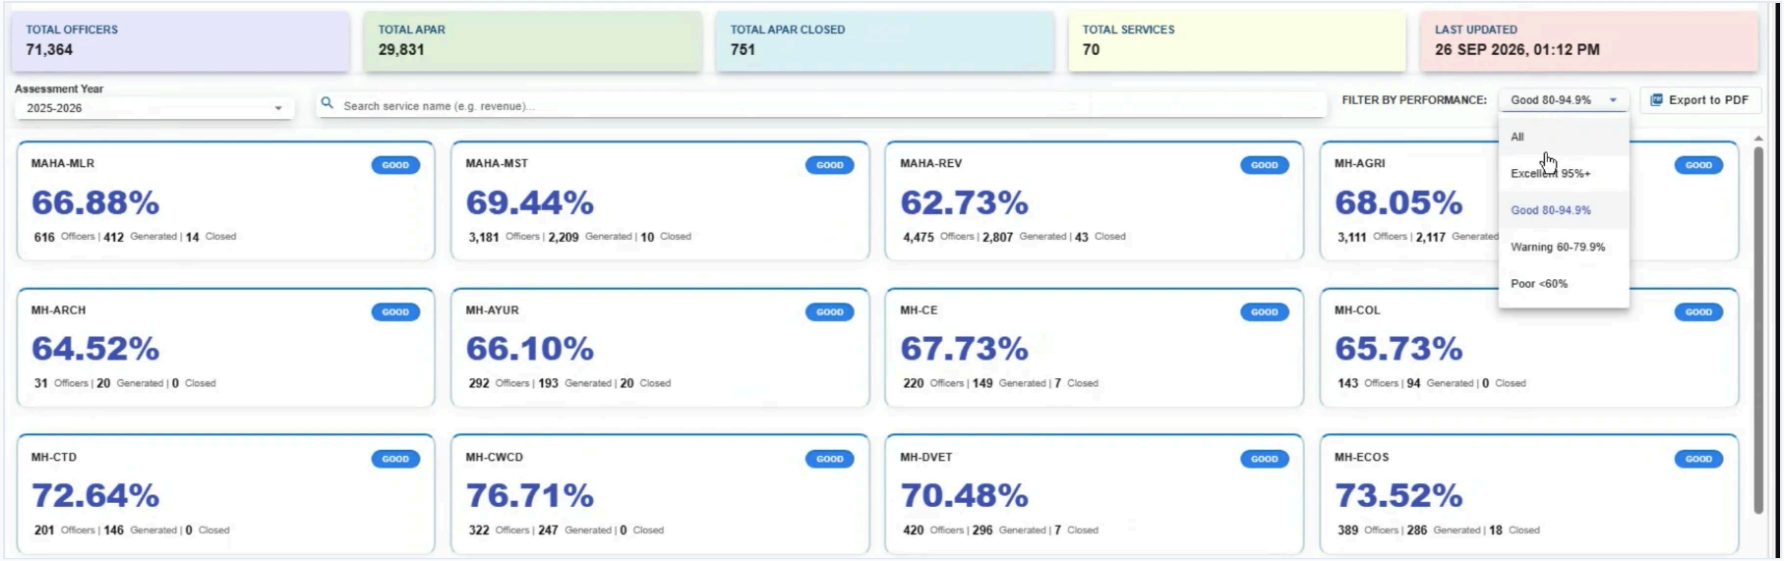

Officer-wise Statistics opens here | PAR-wise Statistics

ORGANISATION	OFFICERS	APAR INITIATED	NOT INITIATED	%
MH-LR-AURANGABAD	108	69	39	63.89%
MH-LR-PUNE	96	73	23	76.04%

Why it helps. Most users want the regional position at a glance. Opening on the view that fits the screen gives them that without any navigation.

7 Order the service cards by completion, lowest first

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The Instance Dashboard presents around 70 service cards in alphabetical order. A viewer looking for the services needing attention must read through the full set.

SUGGESTED REFINEMENT

Order the cards by completion percentage, lowest first, so the services requiring follow-up appear at the top. An **A–Z** option can remain for those looking for a particular service, alongside the search box already provided.

Effort Very low — default sort order.

INDICATIVE FORM OF THE SUGGESTION

Sort by **Lowest completion first** | A–Z

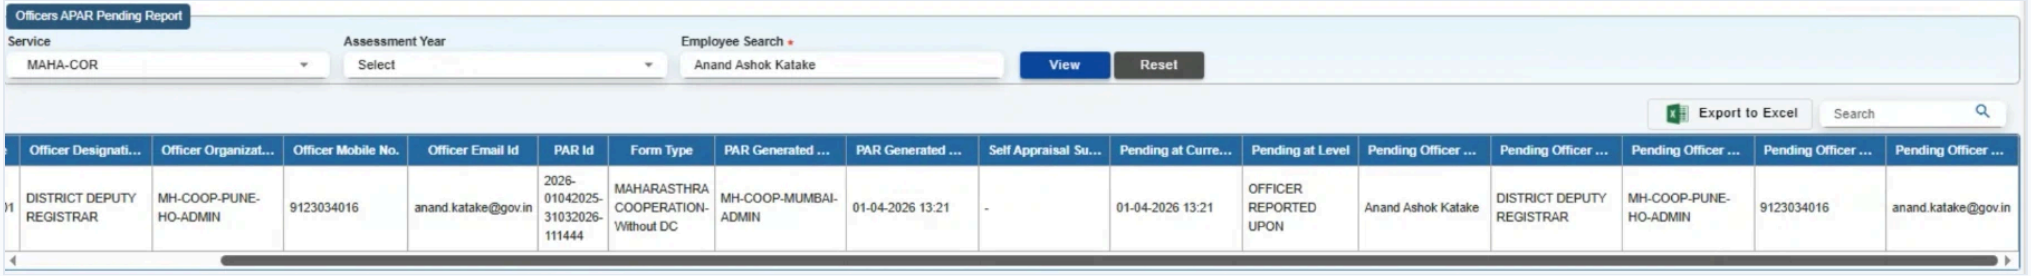

MH-XXX	**41.2%**	**MAHA-YYY**	**48.7%**
MH-ZZZ	**56.0%**	**MAHA-MLR**	**66.9%**

Services needing attention surface first.

Why it helps. It turns a reference list into a priority list, using the figures already on each card.

8 Give each pendency column a distinct heading

AS PRESENTLY DISPLAYED IN SPARROW

Officer Designati...	Officer Organizat...	Officer Mobile No.	Officer Email Id	PAR Id	Form Type	PAR Generated ...	PAR Generated ...	Self Appraisal Su...	Pending at Curre...	Pending at Level	Pending Officer ...	Pending Officer ...	Pending Officer ...	Pending Officer ...	Pending Officer ...
DISTRICT DEPUTY REGISTRAR	MH-COOP-PUNE-HO-ADMIN	9123034016	anand.katake@gov.in	2026-01042025-31032026-111444	MAHARASTHRA COOPERATION-Without DC	MH-COOP-MUMBAI-ADMIN	01-04-2026 13:21	-	01-04-2026 13:21	OFFICER REPORTED UPON	Anand Ashok Katake	DISTRICT DEPUTY REGISTRAR	MH-COOP-PUNE-HO-ADMIN	9123034016	anand.katake@gov.in

WHAT WE OBSERVED

The Officers APAR Pending Report carries five adjacent columns whose headings all abbreviate to **“Pending Officer …”**. On screen they are indistinguishable from one another.

SUGGESTED REFINEMENT

Rename them to describe what each holds: **Pending with · Designation · Office · Pending since (days) · Contact**.

Effort Very low — heading text only.

INDICATIVE FORM OF THE SUGGESTION

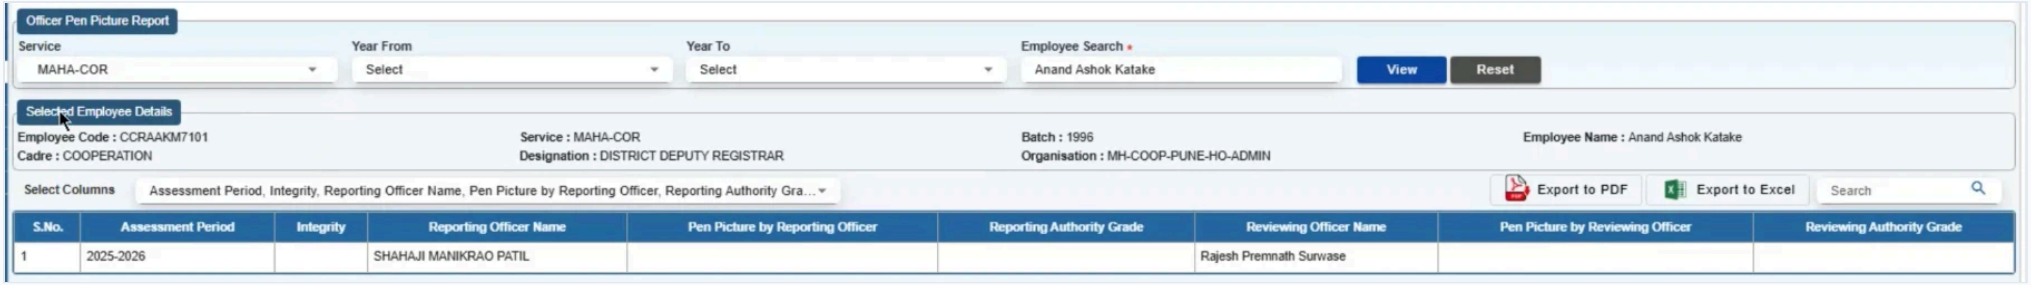

PENDING WITH	DESIGNATION	OFFICE	PENDING SINCE	CONTACT
Anand Ashok Katake	District Deputy Registrar	MH-COOP-PUNE-HO	**47 days**	9123034016

Same five columns, named for what they carry.

Why it helps. This report holds precisely the information GAD needs for follow-up. Distinct headings make it usable without opening the export.

9 Allow the pending and pen-picture reports to run for all officers

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

Employee Search is a mandatory field on the Officers APAR Pending Report and the Officer Pen Picture Report. A user must therefore know an officer's name before the report will run, and the result returns one officer at a time.

SUGGESTED REFINEMENT

Make the officer name optional, with the report defaulting to all officers in the selected service and assessment year. The name can remain as a filter for those who want a single record.

Effort Low to moderate — removing the mandatory filter and returning a list rather than a single row.

INDICATIVE FORM OF THE SUGGESTION

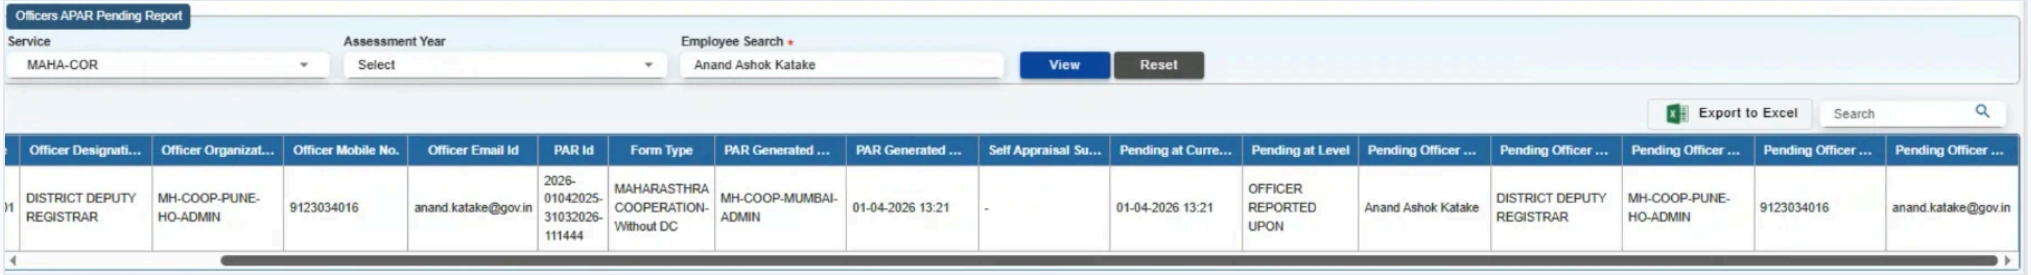

Service **MAHA-COR** Assessment Year **2025-26** Officer name *optional* **View**

OFFICER	PENDING WITH	SINCE
Anand Ashok Katake	Self-appraisal — officer	**47 days**
Medha Gopal Wake	Reporting authority	**21 days**
... 206 officers in this service		

Why it helps. This is the change that converts a record-lookup facility into the monitoring report that cadre and service authorities have asked for. The query and the export already exist.

10 Use administrative wording in the status fields

AS PRESENTLY DISPLAYED IN SPARROW

Officer Designati...	Officer Organizat...	Officer Mobile No.	Officer Email Id	PAR Id	Form Type	PAR Generated ...	PAR Generated ...	Self Appraisal Su...	Pending at Curre...	Pending at Level	Pending Officer ...	Pending Officer ...	Pending Officer ...	Pending Officer ...	Pending Officer ...
DISTRICT DEPUTY REGISTRAR	MH-COOP-PUNE-HO-ADMIN	9123034016	anand.katake@gov.in	2026-01042025-31032026-111444	MAHARASTHRA COOPERATION-Without DC	MH-COOP-MUMBAI-ADMIN	01-04-2026 13:21	-	01-04-2026 13:21	OFFICER REPORTED UPON	Anand Ashok Katake	DISTRICT DEPUTY REGISTRAR	MH-COOP-PUNE-HO-ADMIN	9123034016	anand.katake@gov.in

WHAT WE OBSERVED

The status column reads **“Pending at Level: OFFICER REPORTED UPON”**. This is the system's internal description of the stage rather than the wording used in the APAR instructions.

SUGGESTED REFINEMENT

Present the stage in the language of the process — **“Awaiting self-appraisal by the officer”**, **“Awaiting assessment by the reporting authority”**, **“Awaiting review by the reviewing authority”**.

Effort Very low — a wording map for the existing status values.

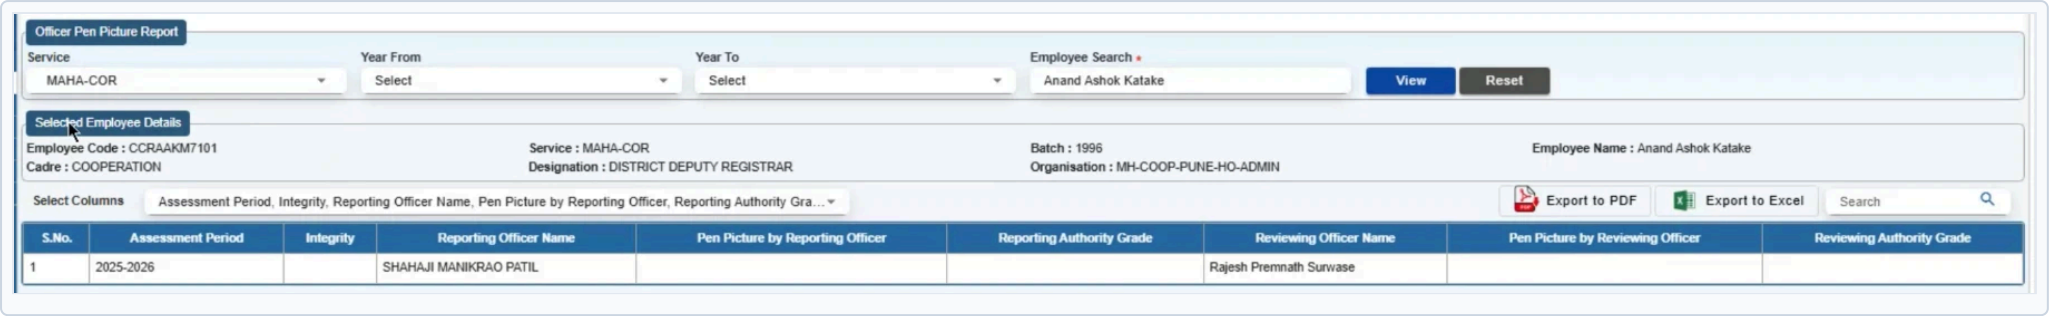

INDICATIVE FORM OF THE SUGGESTION

STAGE (as displayed today)	SUGGESTED WORDING
OFFICER REPORTED UPON	Awaiting self-appraisal by the officer
REPORTING AUTHORITY	Awaiting assessment by the reporting authority
REVIEWING AUTHORITY	Awaiting review by the reviewing authority
WORKFLOW NOT CREATED	APAR not yet initiated by the custodian

Why it helps. The same words then appear in the circular, on the dashboard and in the report, which reduces queries to the helpdesk and to GAD.

11 Bring the Select Columns facility into view

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The Pen Picture Report allows the user to choose which columns are displayed. The facility sits inside a dropdown alongside the column list and is easy to miss.

SUGGESTED REFINEMENT

Place **Select columns** as a visible control beside Export to PDF and Export to Excel, where users already look for table controls.

Effort Very low — relocation of an existing control.

INDICATIVE FORM OF THE SUGGESTION

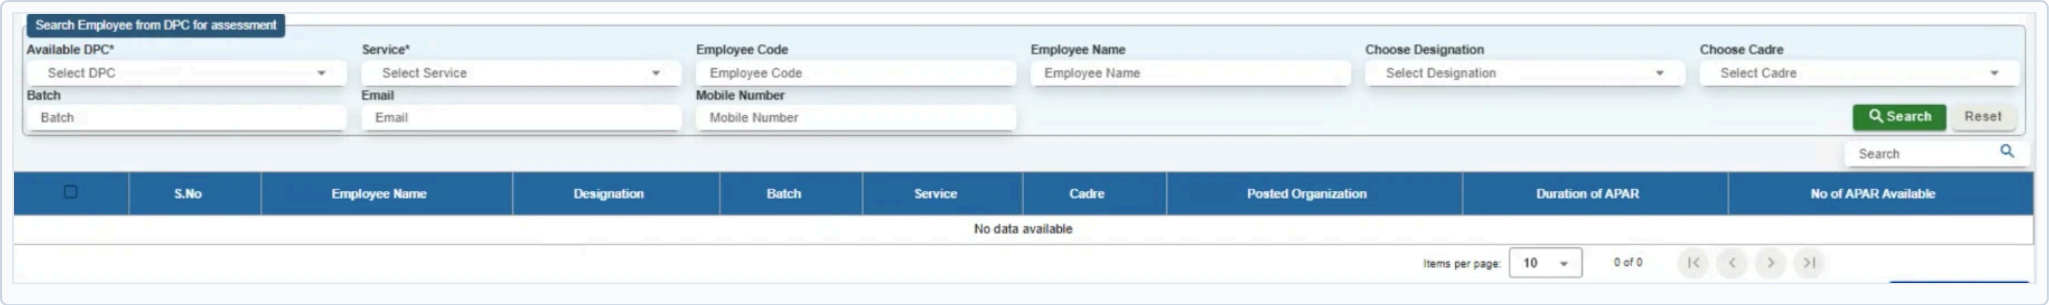

Select columns (7 of 12) **Export to PDF** **Export to Excel** Search

The control already exists; this places it where users look for it.

Why it helps. A facility that addresses the width of these reports is already built. Making it visible is the whole of the work.

12 Distinguish “no selection made” from “no records yet”

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

Several screens display **“No data available”** with pagination reading 0 of 0 — the Role Details window, the DPC Officer's Assessment screen before any selection, and the Pen Picture report. On the Officer's Assessment screen a **Download Zip** button remains active over the empty table.

SUGGESTED REFINEMENT

Use wording that names the reason: **“Select a DPC and service to begin”** before a selection; **“No officers are mapped to this role at present”** where the set is genuinely empty; **“Pen picture not yet recorded — reporting stage is in progress”** where the stage is pending. Export buttons may be greyed until rows are present.

Effort Low — empty-state text and a condition on the export button.

INDICATIVE FORM OF THE SUGGESTION

Select a DPC and service to begin

Officers eligible for consideration will be listed here once a DPC is selected.

No officers are mapped to this role at present

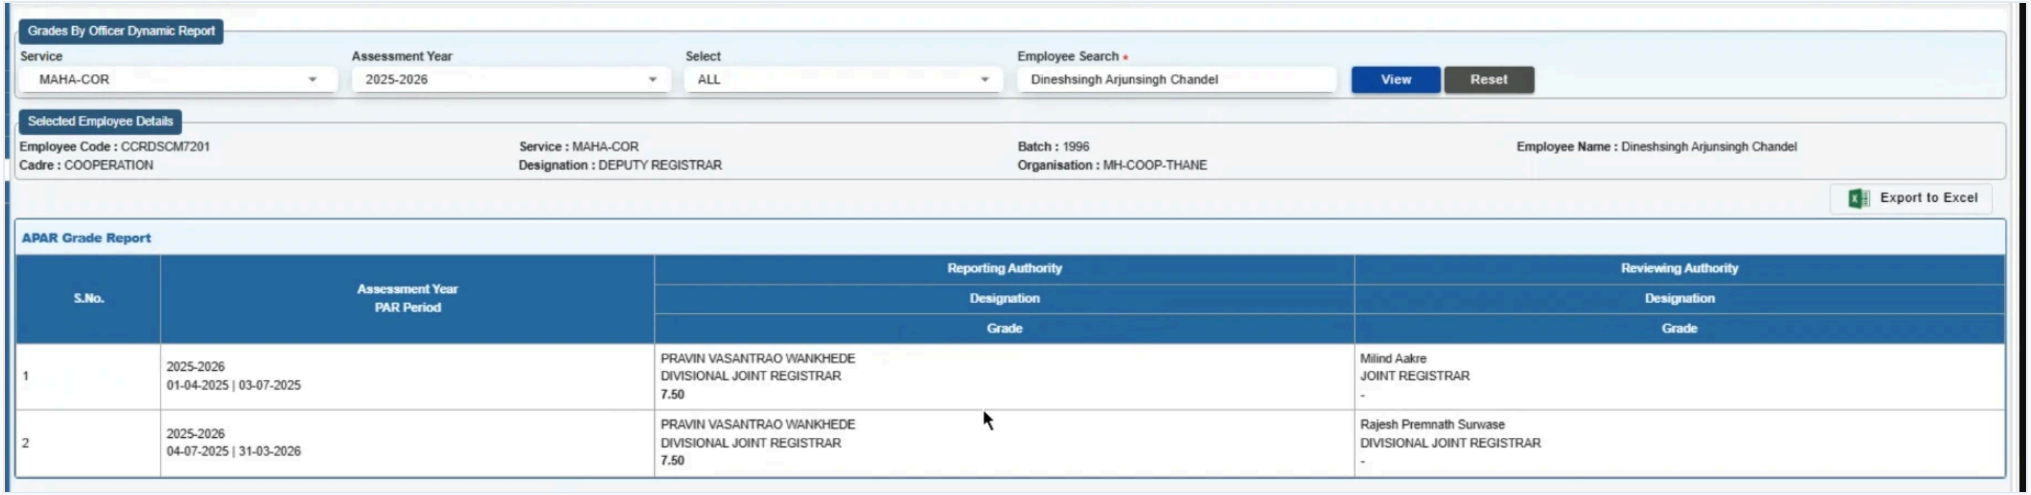

Mapping is carried out by the establishment officer.

Download Zip available once officers are listed

Why it helps. These screens are the ones most often seen during demonstrations. Wording that explains the position reads as a system working correctly rather than one returning nothing.

13 Explain a blank grade rather than showing a dash

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

On the Grade By Officer report the reviewing authority's grade is shown as **“-”** for both reporting periods, while the reporting authority's grade is recorded. The report does not indicate whether the review is pending or was not required.

SUGGESTED REFINEMENT

Replace the dash with the position: **“Not yet recorded — reviewing stage pending since 30 Sep 2026”**, or **“Review not applicable for this period”** where that is the case.

Effort Low — a status message in place of the empty value.

INDICATIVE FORM OF THE SUGGESTION

PERIOD	REPORTING AUTHORITY	REVIEWING AUTHORITY
01-04-2025 to 03-07-2025	P. V. Wankhede — **7.50**	Milind Aakre Not yet recorded — pending since 30 Sep 2026

Why it helps. The grade is the single most consequential field in the record. A reader should not have to infer why it is blank.

14 Show how recent the figures are

AS PRESENTLY DISPLAYED IN SPARROW

S.NO.	ORGANIZATION NAME	OFFICERS POST...	APAR GENERATED	APAR CLOSED	APAR PARTIALL...	APAR COMPLET...	WORKFLOW CR...	WORKFLOW NO...	PAR PERCENTAGE	PERFORMANCE ...	PENDING CUST...	PENDING OFFIC...	PENDING REPO...	PENDIN
1	MH-LR-AMRAWATI REGION	77	99	2	0	0	0	23	70.13%	GOOD	0	9	19	34
2	MH-LR-AURANGABAD REGION	108	140	0	0	0	0	41	63.89%	GOOD	0	24	40	16
3	MH-LR-MUMBAI REGION	96	112	0	0	0	0	31	63.54%	GOOD	0	19	27	21
4	MH-LR-NAGPUR REGION	85	135	1	0	0	0	17	81.18%	EXCELLENT	0	13	14	68
5	MH-LR-NASHIK REGION	99	172	10	0	0	0	38	63.64%	GOOD	0	37	25	21
6	MH-LR-PUNE REGION	96	120	1	0	0	0	24	76.04%	GOOD	0	0	29	43
7	MH-LR-SETTLEMENT COMMISSIONER OFFICE	50	90	0	0	0	0	22	56.00%	WARNING	0	0	12	24
	Total	611	868	14	0	0	0	202			0	102	166	227

WHAT WE OBSERVED

The dashboards carry a **Last Updated** stamp. On the screens reviewed it reads 26 September while the screen was being viewed on 8 October, a difference of twelve days, which is not drawn to the viewer's attention.

SUGGESTED REFINEMENT

Add the elapsed time beside the stamp — **“Last updated 26 Sep 2026 (12 days ago)”** — and show it in amber once it exceeds the refresh interval agreed with GAD.

Effort Very low — a derived value beside an existing field.

INDICATIVE FORM OF THE SUGGESTION

LAST UPDATED

26 SEP 2026, 05:08 PM

12 days ago — figures may not reflect the current position

Why it helps. Monitoring authorities may act on these figures in review meetings. Knowing their vintage is part of reading them correctly.

15 Display implausible legacy values as “Not available”

AS PRESENTLY DISPLAYED IN SPARROW

EMPLOYEE NAME	EMPLOYEE CODE	DESIGNATION NAME	EMPLOYEE CADRE	ALLOTMENT YEAR	WORK STATUS
HARIBHAU BABURAO SANTANSE	160619642425892_mahapar	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1983	No Workflow Created
NITIN BHAGWAT GANAPURE	DLRNBGM8201	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	2014	No Workflow Created
DILIP TULSHIRAM BAGULE	DLRDTBM7101	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1999	No Workflow Created
RAVINDRA RAMMYA MUTHA	DLRRRMM6401	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1982	No Workflow Created
KISHAN SEKU PAWAR	DLRDSPM6101	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1983	No Workflow Created
DIGAMBAR WALMIK BHOGAWADE	MFSDWBM8701	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1900	No Workflow Created
VISHNU VITHOBA PAWAR	DLRVVPM6501	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1990	No Workflow Created
ARVIND BHAURAO SAMBHARE	DLRABSM7101	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	2000	No Workflow Created
RAJENDRA LAXMAN WAGH	DLRRLWM6001	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1990	No Workflow Created
PRAKASH MUKUND SANKHE	DLRPMSM6401	DEPUTY SUPERINTENDENT OF LAND RECORDS	GROUP B	1991	No Workflow Created

WHAT WE OBSERVED

Allotment year is shown as **1900** for some officers, which appears to be a placeholder carried in from the source record rather than a true year.

SUGGESTED REFINEMENT

Display such values as **“Not available”** at the point of display, and give GAD a count of affected records so that the source data can be corrected in due course.

Effort Low — a display rule, plus a count for GAD.

INDICATIVE FORM OF THE SUGGESTION

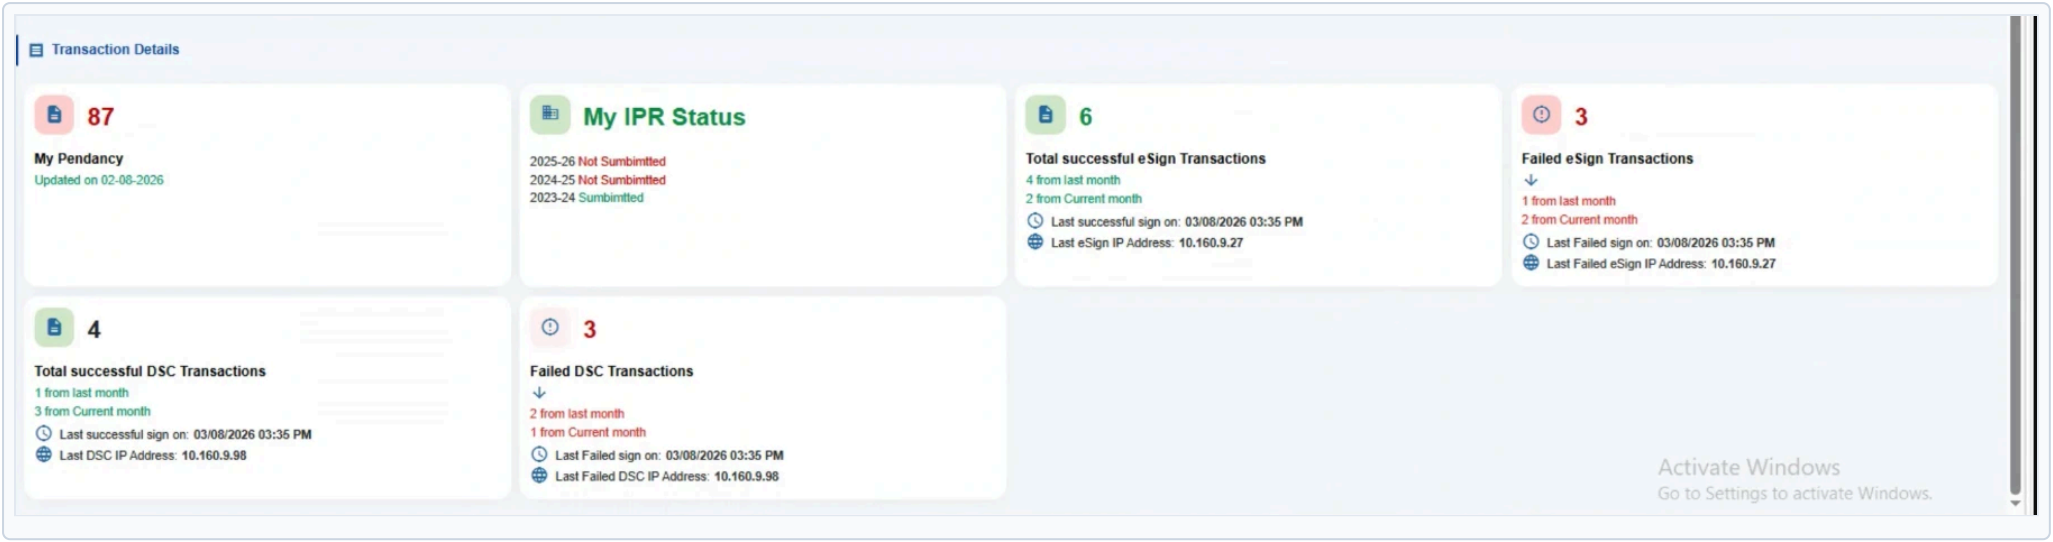

OFFICER	DESIGNATION	ALLOTMENT YEAR
Digambar Walmik Bhogawade	Dy Supdt of Land Records	Not available
Nitin Bhagwat Ganapure	Dy Supdt of Land Records	2014

> **For GAD:** 1 of 41 records in this region carries a placeholder allotment year.

Why it helps. It prevents an evident placeholder from appearing in reports placed before senior officers, while the underlying correction is taken up separately.

16 Make “My Pendency” answer what the officer must do

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The officer's dashboard shows **My Pendancy: 87** as a single figure, alongside tiles for successful and failed eSign and DSC transactions and the IP addresses used. The pendency figure does not indicate how many items await action by the officer and how many are with others.

SUGGESTED REFINEMENT

Present two figures — **Awaiting my action** and **Awaiting action by others** — each opening the corresponding list. The signature transaction and IP address tiles may be grouped lower on the page under **Signature activity**.

Effort Low to moderate — re-weighting existing tiles and splitting one count that the system already holds by stage.

INDICATIVE FORM OF THE SUGGESTION

12
Awaiting my action
3 due within 7 days

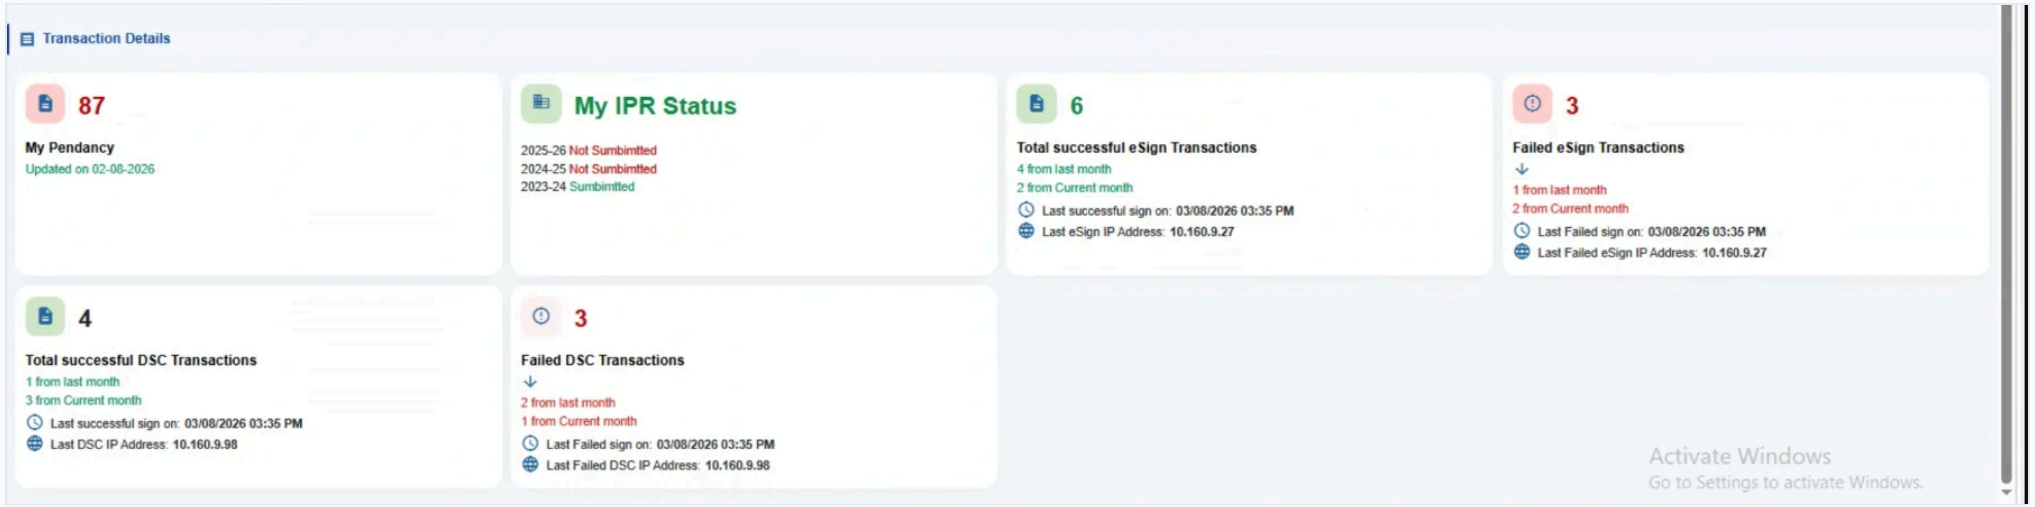

75
Awaiting action by others
with reporting and reviewing authorities

▸ Signature activity eSign and DSC transactions, last sign-in details

Why it helps. It tells the officer what to do today, which is the purpose of the window. The signature details remain available for verification, without occupying the first screen.

17 Correct the spellings, and place IPR under its own menu

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The officer's dashboard carries **“My Pendancy”**, **“Not Submimtted”** and **“Sumbimtted”**. The same screen also carries **My IPR Status**, which relates to the Immovable Property Return rather than to the APAR.

SUGGESTED REFINEMENT

Correct the three spellings to **Pendency**, **Not submitted** and **Submitted**. Place IPR under its own menu item so that the APAR window carries APAR matters only.

Effort Very low — text corrections and one menu placement.

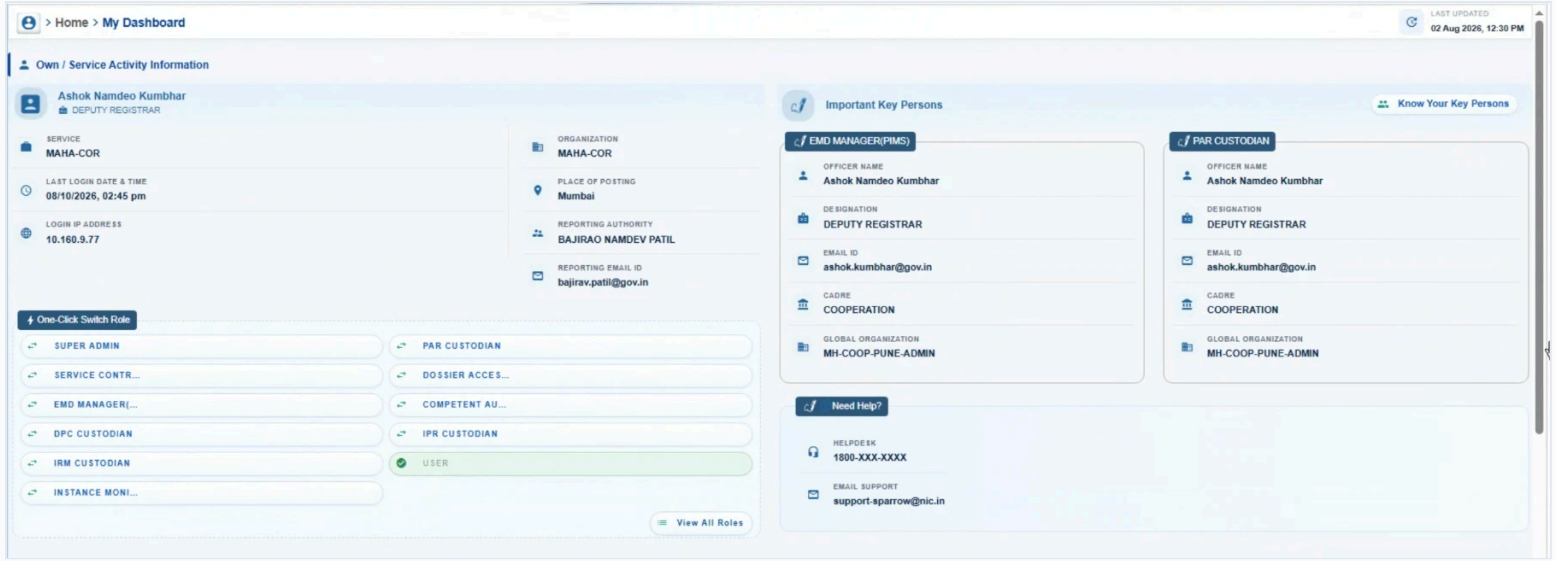

INDICATIVE FORM OF THE SUGGESTION

PRESENTLY	SUGGESTED
My Pendancy	My Pendency
Not Submimtted	Not submitted
Sumbimtted	Submitted
My IPR Status *(on the APAR window)*	IPR — under its own menu

Why it helps. These are the first things noticed in a demonstration before GAD and senior officers, and they cost nothing to put right.

18 Show the roles the user presently holds

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

The **One-Click Switch Role** panel lists eleven roles near the top of the window, of which the user holds one. The panel occupies the upper part of the screen, placing the officer's own APAR information further down.

SUGGESTED REFINEMENT

Show only the roles held, with the remainder behind the **View All Roles** control already provided.

Effort Very low — a filter on an existing list; the control for the full list already exists.

INDICATIVE FORM OF THE SUGGESTION

✓ **USER** current

PAR CUSTODIAN

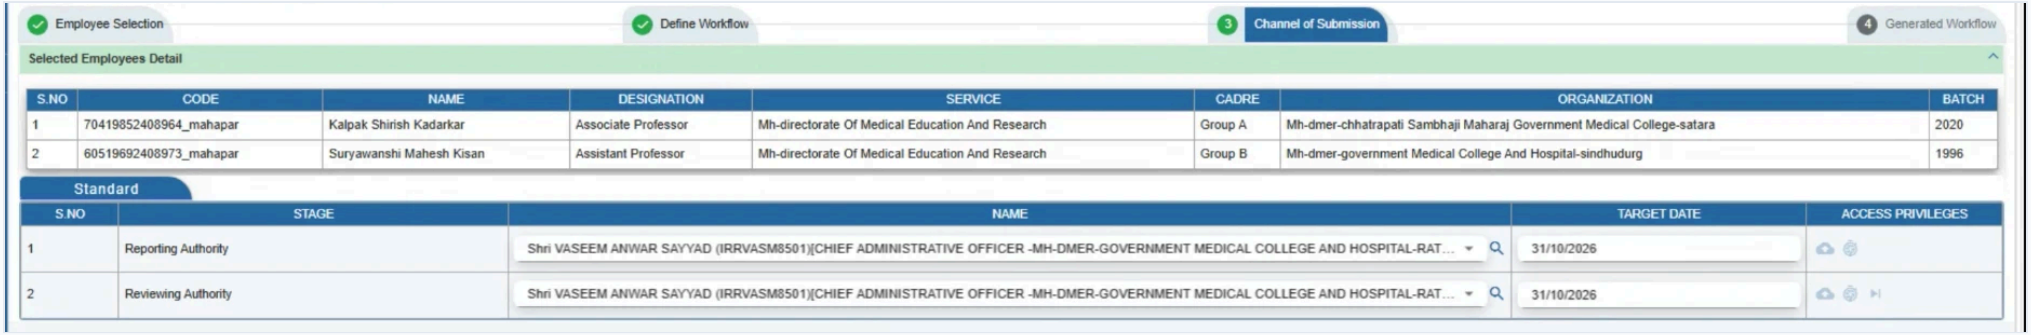

View all roles (11)

Roles held are shown; the full list remains one click away.

Why it helps. It returns the upper part of the window to the officer's own position, which is what most users come to the screen for.

19 Avoid defaulting the same officer to both authorities, and stagger the two target dates

AS PRESENTLY DISPLAYED IN SPARROW

WHAT WE OBSERVED

On the Channel of Submission step, the same officer appears selected as both **Reporting Authority** and **Reviewing Authority**, and both target dates default to the same date, 31/10/2026. Separately, **Form Type** on the preceding step is a required field presented without an indication of which form applies to which group of officers.

SUGGESTED REFINEMENT

Leave the reviewing authority blank for the custodian to select, and display a confirmation message where the same officer is chosen for both roles. Default the reviewing target date after the reporting target date. Against Form Type, show the applicable form for the officer's group, for example **“Form A — Group A and B officers”**.

Effort Low — default values, one confirmation message, and a help line against Form Type.

INDICATIVE FORM OF THE SUGGESTION

STAGE	NAME	TARGET DATE
Reporting Authority	Shri Vaseem Anwar Sayyad	31/07/2026
Reviewing Authority	Select reviewing authority	30/09/2026

> The reporting and reviewing authority are the same officer. Please confirm this is intended before proceeding.

Why it helps. The two-stage check is the core safeguard in the APAR process. A default that places one officer in both roles may be carried forward unnoticed when workflows are created in bulk.

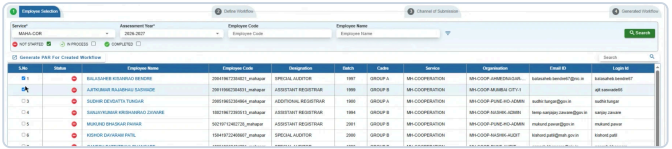

Three features that work well and should be carried forward

We note these explicitly so that they are not altered in the course of taking up the suggestions in this note. Each addresses a need that GAD has raised, and each is already built.

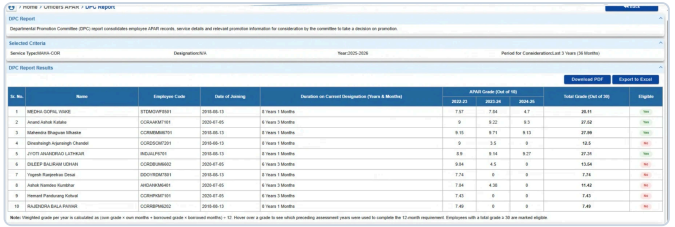

Drill-through from the aggregate to named officers

From the regional figure to the list of officers whose workflow has not been created, with Excel and CSV export. This is the step that makes the dashboard actionable, and it already works.

The four-step workflow creation wizard

Numbered progress, bulk selection, and Not Started / In Process / Completed filters on the officer list. The structure is sound and should be retained as the pattern for other multi-step screens.

The DPC report's method note and hover facility

The report states how the weighted grade is calculated and allows the user to hover to see which preceding years were used. This degree of openness about method is unusual and valuable, particularly for a report placed before a committee.

How we would suggest taking this forward

The suggestions in this note are offered for GAD's consideration in the first instance, and thereafter for discussion with NIC. We have grouped them so that a decision can be taken on each group rather than on all nineteen at once.

1. **GAD's view on the list.** Confirm which suggestions GAD wishes to take up, and whether any further points should be added from the department's own experience of the system.
2. **Confirm the two rules that need a departmental decision.** Suggestion 3 requires GAD to confirm the DPC eligibility threshold the report should apply. Suggestion 14 requires the refresh interval beyond which dashboard figures should be flagged as dated.
3. **Discussion with NIC on effort and sequence.** NIC to confirm or correct the indicative effort against each suggestion, and to advise which can be taken up in the current release.
4. **A short first set.** We would suggest the wording and ordering changes be taken up together as a first set, as they require no change to data or queries.
5. **Review after the first set is deployed.** A walkthrough with GAD and NIC once the first set is live, before taking a view on the remainder.

Two points for GAD's decision

DPC eligibility threshold. The report's note and its computation presently state different thresholds. The correct rule is a departmental matter rather than a technical one, and NIC will need it confirmed before the note can be corrected.

Refresh interval for the dashboards. Suggestion 14 proposes that figures be flagged once they exceed an agreed age. That interval is for GAD to set, having regard to how the dashboards are used in review meetings.

What this note does not cover

The observations here are confined to the dashboard and report screens recorded in October 2026. They do not extend to the APAR forms themselves, to the officer's filing experience, or to the data held in the source systems, each of which is being taken up separately.

Acknowledgement

The screens reviewed represent a substantial body of work covering officer, service, instance and departmental levels, together with workflow creation and a set of departmental reports. The suggestions in this note are offered in that context.
