APAR under MahaPAR: who does what, by when, and how

Draft for discussion with GAD | IDinsight | Based on Form A, for Group A and Group B officials, current draft

> The APAR covers the financial year just ended, 1 April to 31 March, and the cycle opens on the following 1 April. The APAR for 2025-26 opens on 1 April 2026.
>
> Every part is filed in MahaPAR and signed with a digital signature or eSign. Paper forms are not accepted.
>
> If a stage is not completed by its date, MahaPAR forwards the APAR to the next stage, records the delay, and deducts timeliness marks from the APAR of the official who held it. These marks are 5 per cent of the final score, that is −0.5 to +0.5 on the 10-point scale, and they sit in Part 6, which MahaPAR generates on its own. Timeliness is counted for every role an official holds in the cycle: their own self-appraisal, their assessments as a reporting officer, and their reviews as a reviewing officer.

A. The cycle at a glance

31 March	Reporting year ends
1 April	Cycle opens
15 April	Official confirms Part 1
30 April	Custodian verifies Part 1 and the mapping
15 May	Self-appraisal
15 June	Reporting officer
15 July	Reviewing officer
31 July	Accepting authority, if GAD adds this stage and a stage is missing
31 December	Cycle closes

Note on the dates. The dates shown are the ones proposed in the stakeholder draft, modelled on Gujarat's cycle, which gives each stage about 30 days. They will be finalised in consultation with GAD.

After the reviewing stage the completed APAR is disclosed to the official by the custodian. The official may submit one representation within 15 days of disclosure. No entries are accepted after the cycle closes.

B. Officers in the APAR chain

Official reported upon

Every Group A and Group B official for whom an APAR is generated.

5 actions

Responsibility	Form	By when	How it is done in MahaPAR
Keep a work log through the year. Record noteworthy tasks and activities as they happen.	2.2	Through the year	The work log is open all year in MahaPAR and the eHRMS app. Entries can be pulled into the self-appraisal (2.2) when the cycle opens, so the official is not writing the year from memory in May.
Respond to any memo issued to you by the reporting officer.	–	Within the date given in the memo	Memos are issued and answered in eHRMS through the year. The reply is recorded against the memo itself and is shown to the reporting officer at grading, along with whether the memo was answered.
Check Part 1 and the reporting chain mapped for you, and ask for a correction where it is wrong.	Part 1, 1.1, 1.2	15 April	Details come from Sevaarth and the service record. The chain is shown as a row for each period and is mapped by the custodian. **Request a correction** sends an error to the custodian. Where eHRMS is not yet live, leave or absence of 30 days or more is entered by the official. Any No Report Certificate raised for a period of less than three months is shown here for checking.
Fill and submit the self-appraisal.	Part 2	15 May	The whole of Part 2 on one page: key activities and targets with achievements (2.1), the most significant contribution (2.2), any systemic factors (2.3), trainings completed (2.4), up to three training areas needed (2.5), and the technical cadre module where applicable (2.6). Signed with DSC or eSign.
Read the disclosed APAR and submit a representation if any.	Part 6	Within 15 days of disclosure	The outcome opens in MahaPAR with one representation box. The memos issued during the year and the replies are attached automatically.

Reporting officer

The officer under whom the official served for three months or more in the year.

3 actions

Responsibility	Form	By when	How it is done in MahaPAR
Issue a memo during the year where an official mapped to you needs to improve.	–	Through the year, as the concern arises	Memos are raised in eHRMS, where the reporting chain is maintained, and can be issued on any day of the year. A memo cannot be back-dated, so a concern recorded only at grading time attaches to the next cycle, not to the year being assessed. MahaPAR reads the memos at grading.
Read the self-appraisal of the official before grading.	Part 2	15 June	The whole of Part 2 opens above the grading table: the key activities and targets with achievements, the most significant contribution, any systemic factors, the trainings completed and the training the official has asked for. The memo record for the year, with whether each memo was answered, opens alongside it.
Record your own assessment. This covers: • grading the six dimensions, and the technical module where the official is in a technical cadre • justifying any grade of 1 to 2 or 9 to 10 by a specific accomplishment or failure • attaching the memos issued during the year where the overall grade is below the benchmark of 6 • recording integrity • writing the overall assessment • stating whether you agree with the self-appraisal • confirming or changing the training the official asked for, and recommending up to three trainings	Part 3	15 June	Annexure 3 explains what each dimension looks like in a desk post and in a field post. System data on iGOT hours, eOffice use and attendance is shown for reference and is not weighted. The justification box opens automatically for a grade of 1 to 2 or 9 to 10, and the stage cannot be signed until it is filled; memos are shown against the dimension they relate to and can be cited there. Where the overall grade is below 6, the memo record and the replies are attached with one click. Doubtful integrity requires reasons in a separate confidential note. Each recommended training is marked domain, functional or behavioural.

Reviewing officer

The officer immediately senior to the reporting officer in the mapped chain.

1 action

Responsibility	Form	By when	How it is done in MahaPAR
Complete the review of each APAR that comes to you. Agree with the reporting officer’s overall grade, or record your own overall grade with the reason.	Part 4	15 July	Agreeing takes two clicks. Dimension-wise grades are not revised. Where you differ, your grade replaces the reporting officer’s overall grade, and a grade of 1 to 2 or 9 to 10 needs the specific accomplishment or failure behind it.

Accepting authority (only if GAD adds this stage)

Maharashtra's current forms have no accepting stage. If GAD adds one, it acts only where a stage was never completed; it is not an appellate stage and does not revise grades.

1 action

Responsibility	Form	By when	How it is done in MahaPAR
Record which stage is missing and the action taken, so that the APAR is not left incomplete.	Part 5	31 July	The stage opens only where MahaPAR auto-forwarded a stage that was never recorded.

C. Administrative and monitoring roles

Custodian (establishment officer)

Responsible for APAR data of one office (organisation unit).

9 actions

Responsibility	Form	By when	How it is done in MahaPAR
Open the cycle for the year and notify the dates set by GAD.	–	1 April	**Initiate cycle and complete authority mapping**. Past cycles can be viewed and exported from the same place.
Map each official's tenures and reporting and reviewing officers for the year, and verify Part 1.	Part 1, 1.1	30 April	Selected from drop-down lists. Once office orders are digitised and linked to eHRMS this will be pre-filled and the custodian will only validate or correct it.
Verify and issue No Report Certificates.	1.2	30 April	MahaPAR raises the NRC from the mapped period; the custodian verifies the period and signs.
Act on correction requests raised by officials on Part 1 and the chain.	Part 1, 1.1	30 April	Requests appear in the mapping screen against the official who raised them.
Track what is pending across the cycle and follow it up.	–	Throughout the cycle	**Track what is pending across APAR cycle** shows the count at each stage. **Facilitate APAR cycle** carries two actions: send bulk reminders to all pendencies, or open an individual pendency and follow it up.
Track memos issued in the office and remind officials who have not answered one.	–	Throughout the cycle	The memo tracking section lists officials with unanswered memos and sends them a reminder. The custodian does not read the memo content.
Disclose the completed APAR to the official and record any representation.	Part 6	After the reviewing stage	Disclosure is a custodian action in MahaPAR. The 15-day representation window runs from the date of disclosure.
Supply APARs to the Departmental Promotion Committee.	–	On requisition	Closed APARs are exported from the register for the cadre and period asked for. ***Future direction:*** *once the DPC reports are built into MahaPAR, closed APARs will be fetched by the system for the cadre and period concerned, and this will no longer be a custodian action.*
Close the cycle on the date notified by GAD.	–	31 December	No entries are accepted after the cycle closes. Closed cycles stay available for viewing and export.

Cadre Monitoring Authority

One cadre across all offices, for example Assistant Police Inspector.

3 actions

Responsibility	Form	By when	How it is done in MahaPAR
Watch how the cadre is progressing through the cycle and see which APARs are generated, closed or pending.	–	Throughout the cycle	**View Cadre Report**, with the count at each stage for the whole cadre.

Responsibility	Form	By when	How it is done in MahaPAR
Open an individual official's details and past APARs where a case needs to be examined.	–	As required	From the cadre report, an official's record and closed APARs can be opened directly.
Liaise with the custodian of each office where pendency in the cadre is not moving, and follow it up with them.	–	After the custodian's own follow-up	The cadre report shows which office the pendency sits in. Reminders to officials are sent by the custodian of that office, so the Cadre Monitoring Authority takes it up with the custodian and not with the official.

Sub Department Monitoring Authority

One whole sub department, for example MH-POLICE.

3 actions

Responsibility	Form	By when	How it is done in MahaPAR
Watch how each office and each cadre of the sub department is doing.	–	Throughout the cycle	**Overall Service** for the sub department as a whole, **OU Wise** for each office and **Individual Officers** for a single record.
Follow up on pending APARs in the sub department, office by office and cadre by cadre, with the Cadre Monitoring Authority concerned.	–	Throughout the cycle	OU Wise ranks offices by pendency, so the offices needing attention first are visible without a search. Where the pendency runs across a cadre rather than one office, it is taken up with that cadre's Cadre Monitoring Authority.
Report to GAD on offices where pendency continues after follow-up.	–	Monthly during the cycle	The sub department register can be exported for reporting.

General Administration Department (state administrator)

The state-level view of every department, service, cadre and office.

2 actions

Responsibility	Form	By when	How it is done in MahaPAR
Notify the cycle dates each year.	–	Before 1 April	Set centrally for all departments.
Monitor pendency across the state and follow it up with the Sub Department Monitoring Authority and the Cadre Monitoring Authority concerned.	–	Throughout the cycle	Department, sub department, cadre and office wise reports, with the stage deadlines tracked in one place. Where a sub department is behind, it is taken up with its Sub Department Monitoring Authority; where a cadre is behind across sub departments, with that cadre's Cadre Monitoring Authority.

D. What happens if a stage is not completed

Situation	What happens next
Official does not confirm Part 1 by 15 April	The custodian completes the mapping from the service record.
Official does not submit the self-appraisal by 15 May	The reporting officer assesses on the available record.
Reporting officer does not complete the stage by 15 June	MahaPAR forwards the APAR and the reviewing officer completes the assessment.
Reviewing officer does not complete the stage by 15 July	The reporting officer's assessment becomes final.
A stage is never completed at all	Where GAD adds an accepting stage, the accepting authority records the missing stage and the action taken (Part 5).
Pendency in an office is not moving	Custodian sends reminders, then the Cadre Monitoring Authority takes it up with the custodian, then the Sub Department Monitoring Authority, then GAD.

Follow-up runs upward: official, custodian, Cadre Monitoring Authority, Sub Department Monitoring Authority, GAD. Reminders to an official are sent by the custodian. Each level above follows up with the level below it, not with the official.
